Stowell Associates Helps with Planned Surgeries

June 2014

According to the [Agency for Health Care Research and Quality](#), "the single most important way you can stay healthy is to be an active member of your own health care team." Accurate and timely health information can be essential to a full recovery from surgery.

That is why Stowell Associates, in collaboration with some of our clients, developed the "Practical Guide to Planned Surgeries." This easy to understand guide was written for individuals who are planning for hip or knee replacement. It is intended to complement the information they receive from their surgeons.

This guide includes helpful information about decisions such as:

- Taking prescription medication bottles with you to the hospital.
- Having a home safety evaluation.
- Coordinating an appropriate hospital discharge plan.

Our agency can provide short term help with personal hygiene, meal preparation and transportation until an individual is able to resume normal activities. A recent client of ours shared her experience: "I had two knee replacements six weeks apart. Stowell's caregivers were a great help during the difficult recovery process. They gave my husband respite, which he would not have taken. I felt safe and well cared for and would definitely use Stowell, should a need arise in the future."

Our professional care managers can assist you to develop a practical plan for a successful recovery from a surgical procedure. This may help avoid a medical crisis. Call us at (414) 963-2600 or email jenniferm@caremanagedhomecare.com to schedule a consultation or to receive our Guide.
